Argentine Terrorism to Continue

The effort by Argentine terrorists to free one of their leaders has prompted the US embassy in Buenos Aires to take special security precautions out of concern that American diplomats might become kidnaping targets.

The effort began early this week when a suburban commuter train was sabotaged. A message issued at the time stated that the attacks will continue until guerrilla chief Roberto Quieto is released.

The terrorists are indeed likely to continue their attacks as long as the authorities prevent any chance of negotiation by denying that Quieto is a prisoner. The guerrillas' eagerness to press the issue probably stems from a belief that Quieto is cooperating with military leaders and providing information that may damage their movement permanently.
